EXPERIENCE

Software Engineer 3

Aug 2024 – Present

Haas Automation

Oxnard, California

2026

- Developed an AArch64 utility for EEPROM programming to identify machines, featuring CRC calculation, memory/file hex dumping, and file-to-memory writing to support new hardware line releases

2025

- Added support for TI audio codec TLV320AIC3120 by backporting Linux Kernel drivers to i.MX6 and i.MX8 systems
- Modernized U-Boot bootloader architecture by migrating from legacy image to Flat Image Tree (FIT), implementing six distinct boot configurations to support default, rescue, and hardware-specific environments.

2024

- Troubleshooted critical machine interface mapping bug and resolved it as a configuration issue, preventing multiple scheduled emergency hot-fix updates, and resulting in hundreds of hours of saved engineering test time.
- Wrote software change implementing Functional Requirement Specification (FRS) for amplifier fault bits and validated changes with members from Software QA and Electrical Engineering departments.

Software Engineer 2

Aug 2021 – Aug 2024

Haas Automation

Oxnard, California

2023

- Calibrated new camera improving latency of live video feed by roughly 30% by tuning RFB protocol settings for mobile device VNC system
- Collaborated with overseas contractors and oversaw code reviews to maintain health of the codebase.

2022

- Overhauled user interface and refined existing logic implementation of multiple CAN device firmware updater
- Modified software platform and added improvements to core bash script used for manual software update
- Encouraged healthy work life balance by reminding coworkers to take breaks

EDUCATION

California State University, Northridge

Northridge, California

B.S. in Computer Science with honors

TECHNICAL SKILLS

Languages: Java, C, C++

Scripting: Python, Bash, Windows Batch, PowerShell

Testing Frameworks: JUnit, Mockito, PowerMock

Developer Tools: Git, Perforce, PuTTY, VirtualBox, WireShark

Books Read: Effective Java (Favorite), Java Concurrency in Practice

Current Reading: TCP/IP Illustrated, Designing Data Intensive Applications, Software Engineering at Google

CERTIFICATES

Linux Foundation Training:

My love of Linux began here with 128 hours of professional led Linux training

LFD401: Developing Applications For Linux,

LFD420: Linux Kernel Internals and Development,

LFD430: Developing Linux Device Drivers,

LFD440: Linux Kernel Debugging and Security

LFD460: Embedded Linux Development with Yocto Project

AWARDS

Employee Excellence Award, Haas Automation - May 2025

Best Google Cloud Platform Hack at SacHacks, Google - Nov 2018

Second Runner Up for Two Year Colleges at Southern California, ICPC - Nov 2018
